Hunter Ellis

Avionics Research Engineer

ellishw.tech
github.com/hunterwellis
linkedin.com/in/ellishw

Electrical and Computer Engineer interested in the intersection of control systems, robotics, and autonomy.

Skills

Software: C, C++, Python, MATLAB, Simulink, Git, ROS2, Gazebo, Make, CMake, Labview, Qt, PyTorch, OpenCV, $\LaTeX$, Verilog, FreeRTOS, Autodesk Inventor (Certified), SolidWorks, Rhino

Hardware: PCB Design and Assembly, Breadboarding, Computer Architecture, Oscilloscope, Multimeter, 3D-Printing

Technical Experience

Avionics Research Engineer

Georgia Tech Research Institute · Applied Systems Lab

Aug 2025 – Present

Atlanta, Georgia

- Software development for collaborative swarm autonomy systems.
- UAV Research
- Collaborative swarm autonomy
- Systems Integration
- C++ development
- Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.

Robotics Researcher / M.S. Computer Engineering

Virginia Tech · Control, Optimization, and Online Learning for Autonomy Lab

Aug 2023 – May 2025

Blacksburg, VA

- Built a 6-DOF robotic arm and an accompanying ROS2–Gazebo simulation environment for training, evaluating, and deploying custom control algorithms.
- Integrated object detection (YOLOv8), natural language processing, symbolic reasoning, and a DDPG-based reinforcement learning policy for robotic manipulation tasks.
- Aided professors in teaching fundamental concepts in linear systems theory and digital signal processing, including Laplace Transforms, Z-Transforms, system stability, and FIR & IIR filter design.

Thrust Vector Control Intern

Jacobs Space Exploration Group · Thrust Vector Control Test Lab

May 2024 – Aug 2024

Huntsville, AL

- Developed thrust vector control testing hardware and software for NASA's Active Inertial Load Simulator at the Marshall Space Flight Center.
- Created and ran tests to develop a mathematical model of an electro-mechanical actuator – used Python, MATLAB, and LabVIEW.

Control Research Intern

G2ELab · Power Electronics Lab

Jun 2023 – Aug 2023

Grenoble, FR

- Researched different inverter control methods for 4-leg (microgrid) topologies in Simulink and HIL simulation.

Naval Research Enterprise Internship Program

NSWC Carderock · Center for Innovation in Ship Design

Jun 2022 – Aug 2022

Bethesda, MD

- Developed concept hospital sea-train designs and estimated fuel consumption and electrical power loads of the concept sea-trains.

Projects

6-DOF Robot Arm

- 3D printed robot arm, built using stepper motors and pulleys.
- Implemented ROS2 Jazzy control and Gazebo Harmonic simulation.

Education

Master of Science in Computer Engineering

Virginia Tech – Software and Machine Intelligence

May 2025

Blacksburg, VA

Bachelor of Science in Electrical & Computer Engineering

Virginia Tech – Control Systems and Machine Learning (double major)

May 2024

Blacksburg, VA

Papers

A Neuro-Symbolic Reinforcement Learning Architecture: Integrating Perception, Reasoning, and Control – Virginia Tech

Master's Thesis, Jun 2025
